

Company Profile

Introduction

Oshino Lamps GmbH has been an approved supplier to the European industry since 1977. Our "OL" trademark stands for quality, service and reliability. Because of our straightforward organisation we are known to our customers as a flexible and innovative partner.

Mainly in the Automotive Industry we have made our mark through innovative design of reliable illuminating products. Our automotive products can be found in many cars and commercial vehicles. According to this, our slogan could also be "Oshino Inside".

The European Aerospace Industry is also our clientele for our LED and incandescent lamp products as well as the field of Telecommunication, Medical and Process Technology. Our replaceable products for the applications - Display and Signal - are containing the presently brightest LEDs and are well known as replacement products for incandescent lamps in this market segment.

Oshino Lamps GmbH is your development partner for lighting products starting with a first concept through the lighting simulation, the prototype up to serial production.

Your language is our language either talking about NATO-Code numbers, MIL-Standards, DIN and IEC norms or even about FMEA's, PPAP, SPC and IMDS.
