

Company Profile

Qualitymanagement

Oshino Lamps GmbH in Nuremberg is a distribution and developing company under the Oshino association. Oshino Lamps GmbH is being certified according to DIN EN ISO 9001:2000. The production sites in Japan are being certified according to ISO/TS 16949:2002.

Our quality policy covers all stations of a company starting from development, production, stocking, logistics up to customer service. The permanent upgrading of processes, products and services is standing for a real close customer-supplier relationship which will also guarantee in future a demand-covering and cost-efficient realisation of the standards brought to us.

For us, dealing quality conscious, means the efficient and gentle use of valuable resources from technical and commercial point of view as well as to get across broad understanding of our quality policy to our suppliers and service providers.

The Management has assigned to use the actual quality measurements for their responsibility field, to supervise its effectivity and to adapt to the latest realisations and demands. By means of systematic training and professional education of our staff we can ensure that the necessary competence is being guaranteed for the sustainment of our high quality standards.

We are providing the basis for satisfied customers with conscious engagement and active cooperation. This is also the basis for a long-lasting success of our company.
